

Serina Therapeutics announces agreement with AstraZeneca for development of a polyoxazoline (POZ) therapeutic

Huntsville, AL, January 16, 2013

Serina Therapeutics, Inc., a pharmaceutical research and development company that has developed a proprietary, patented polymer technology for drug development, announced today that the company has entered into an agreement with AstraZeneca to develop a polyoxazoline (POZ) polymer therapeutic with an AstraZeneca proprietary compound. The nature of the POZ therapeutic and the terms of the agreement were not disclosed.

About Serina

Serina Therapeutics is a privately held pharmaceutical company located at the Hudson-Alpha Institute for Biotechnology in Huntsville, AL that develops novel polymer therapeutics based on its proprietary polyoxazoline (POZ) technology platforms. The founders and managers of Serina were formerly the key principals of Shearwater Polymers, a company that enabled twelve approved polyethylene glycol (PEG) products for various pharmaceutical partners. Besides developing its own pipeline of pharmaceutical products for Parkinson's disease and cancer, Serina is also partnering its technology with pharmaceutical companies to develop high value products addressing unmet clinical needs.
